

# Sapphire Bay Pond Dye

---

## **100% NON-TOXIC**

### **TREATS 1 ACRE WATER 4-6 FEET DEEP**

The application of Sapphire Bay adds a natural beauty to ponds, lakes and lagoons, aesthetically improving their appearance. When applied at the recommended rates, Sapphire Bay will not stain birds or fish, and is harmless to humans as well as wildlife.

For best results, apply Sapphire Bay prior to plants appearing. Applications during the growing season can suppress the rate and extent of underwater growth, but will not eliminate it. It does not control floating algae mats, free floating plants, nor emergent (shoreline) vegetation.

Allow Sapphire Bay to disperse throughout the water body before using water for swimming, irrigation or livestock watering or avoid pouring concentrate within 50 ft. of these intake/use areas, allowing dye to self-disperse into them.

#### **Directions:**

Apply at the rate of 1 gallon of Sapphire Bay per 1 surface acre of water 4 to 6 feet deep. Use additional Sapphire Bay if a deeper color is desired. Add Sapphire Bay to pond in several locations, pouring directly from the bottle.
