Your aquatic plant control experts!

Dear Neighbor,

We have specialized in controlling pond weeds, lake weeds, and nuisance algae since 1977. The proven solutions we recommend are based on those years of experience. Each year, thousands of home and cabin owners use our products to control aquatic weeds and algae. Plus, ordering online at LakeRestoration.com is easy and safe!

We are back this year with our popular pond, dock, and swim area products to provide your recreational lake or pond relief from weeds and algae. We make and manufacture our own Herbicides (Dibrox® and Spritflo®) and an Algaecide (Mizzen®). We want to continue providing you with season-long weed and algae control so you can enjoy your summer on the water!

Add elegance to your pond or lake with our Vitaflume® floating fountains, the perfect centerpiece for your water. We would like to also introduce you to our De-icer and our new aquatic blaster, the Aqua Stormfuro®. Please visit our website (LakeRestoration.com) for our complete product selection and to see other related products.

We are offering you free shipping with every purchase over \$75 for a cost-effective way to enhance your family's summer experience! Summer is short. Don't lose a minute. Give us a call or visit us online today!

VIEW OUR PRODUCTS ONLINE

LakeRestoration.com

We guarantee that our Lake Restoration products will control the target plant or algae when label guidelines regarding application rates and timing are followed.

Work with our Aquatic Experts to customize products that are timed and measured to give your pond, or dock and swim area what it needs, when it needs it. Keep your water beautiful, clear, and healthy this summer!

POND PRODUCTS

Our pond products are designed to give your pond the healthy and beautiful look it was intended to have. We offer easy-to-use herbicides, algaecides, and nutrient reducers to fit the needs of your pond.

We recommend using these products to get you on your way to a beautiful, clear, and healthy pond:

- Dibrox® Herbicide
- Mizzen® Algaecide
- Sparklear® Nutrient Reducer
- Sapphire Bay® Blue Pond Dye

All of our pond products are applied with ease using the **TORMADA®** product application boat. Watch our video online at LakeRestoration.com

SHATTER POND EXPECTATIONS!

We offer pond solutions that will help restore the natural beauty of your pond, eliminate unpleasant odors caused by algae, and increase the recreational use. Visit our website to view our complete collection of pond products.

To also control algae in your pond, we recommend adding Mizzen® Algaecide to your order.

DOCK & SWIM AREA PRODUCTS

Don't let submerged weeds and algae take over your summer! Our dock area products effectively control submerged weeds and algae. They will also improve recreation and swim areas so you can get the most out of your lake front.

Our dock products will help you control:

- Submerged weeds
- Algae around docks and swimming areas
- Muck and sludge

We recommend using the following products for your dock area:

- Dibrox® Herbicide
- Mizzen® Algaecide
- MuckMaid®

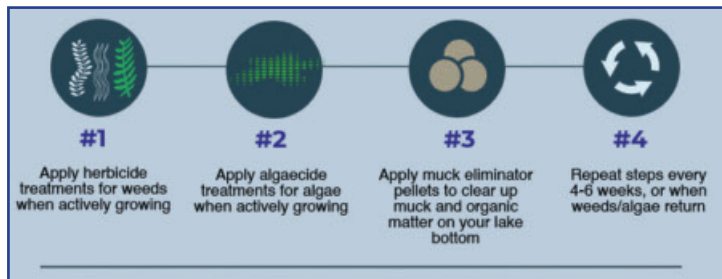

Easily treat your dock area with Dibrox® Herbicide and Mizzen® Algaecide using the TORMADA® product application boat. Watch our video online at LakeRestoration.com.

HAPPINESS IS A SHORE THING!

We recommend that you treat your dock and swim area multiple times per season to achieve optimal lake shore health. The dock and swim area maintenance steps that we recommend will keep you enjoying a beautiful lake shore without unsightly lake weeds.

Dibrox®

Dibrox controls a wide range of floating and submerged weeds, such as duckweed, milfoil, and hydrilla, in ponds and around dock areas.

- Quickly absorbed by plants
- Easily controls dock area weeds

Mizzen®

Mizzen will help to keep your dock area scum and algae levels under control so you can enjoy your water access area to the fullest.

Our liquid, chelated copper-based algaecide, Mizzen®:

- Controls filamentous and planktonic algae
- Concentrated formula is user-friendly

MuckMaid®

Devour the Muck! Get back to enjoying your dock and swim area.

- Bacteria and enzymes devour the build up of organic material
- Improve your recreational area
- Apply every 2-4 weeks

Hydrothol Granular

This granular aquatic herbicide and algaecide controls nearly all lake weed and algae varieties.

- Controls milfoil and hydrilla
- Works best on firm, sandy lake bottoms
- Improves water access areas

The best granular option for your dock area!

Save \$ when you buy both Hydrothol Granular and MuckMaid®!

The best products for your dock and swimming area.

CATTAIL & WATER LILY CONTROL

We recommend using Glyphosate 5.4 and a surfactant to effectively control and kill cattails, water lilies, grass, weeds, poison ivy, and woody brush in and around ponds and lakes.

Glyphosate 5.4 is a systemic herbicide that will kill both the plant and the root. It is EPA approved.

Using a surfactant along with Glyphosate 5.4 as an adjuvant to help the herbicide spread across the leaf, break down the waxy cuticle, and penetrate into the plant.

**Kill Cattails and
Water Lilies!**

- Eliminate unwanted grasses and weeds
- Control cattails, water lilies, and other emergent plants
- Excellent for beach areas above the water line
- Mixes with water for easy application
- Kills the plants and the roots

Glyphosate	1 quart	covers 14,000 sq ft = 1/5 acre	\$44.00
Surfactant	1 quart	covers 14,000 sq ft = 1/5 acre	\$21.00

MUCK ELIMINATION

MuckMaid®

Devour the Muck! Get back to enjoying your dock and swim area when you use our MuckMaid® pellets.

- Bacteria and enzymes devour the build up of organic material
- Improve your recreational area
- Apply every 2-4 weeks

1 pound	covers up to 2,200 sq ft with one application		\$28.00
5 pounds	covers up to 11,000 sq ft		\$81.50
10 pounds	covers up to 22,000 sq ft		\$137.00
20 pounds	two 10 pound bags	\$99.50 each	\$199.00
30 pounds	three 10 pound bags	\$85.00 each	\$255.00
40 pounds	four 10 pound bags	\$81.25 each	\$325.00

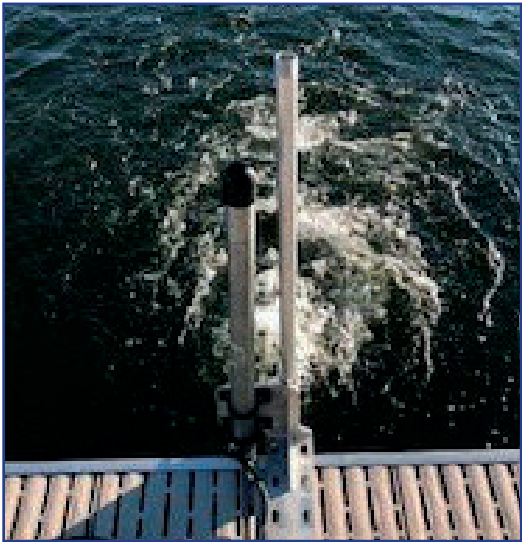

AQUA STORMFURO®

Eliminate muck and improve your water quality while safely removing pond/lake sediment with the Aqua Stormfuro®.

Our aquatic blaster pushes debris and weeds out of the area with a blast of water under the surface. The Aqua Stormfuro® is the only product on the market that has a cage on both the inflow and outflow ends of the motor. This is for added safety and protection from the propeller blade.

- Keep your waterfront clear of algae and unwanted debris
- Eliminate decaying muck and silt
- Stainless steel motor and parts
- Works in minimum of 1' of water
- Blast away decaying leaves and aquatic plants

1/2 HP Aqua Stormfuro	Pushes debris a minimum of 50'	\$995.00

Enjoy
Your
Beach

TORMADA®

Drive your weeds and algae away with the TORMADA® product application boat!

The TORMADA® is an unmanned, lightweight product application boat that enables ponds and dock areas to be treated for weeds and algae. Using a handheld remote, you can control the fan speed and direction of the boat right from the shore. Treat the water right from the shoreline without having to launch a manned boat.

- Have fun driving the TORMADA® while treating for weeds and algae
- Easy and FUN to use
- Simple set up, just connect the battery pack
- Take the chore out of having to treat for weeds and algae

TORMADA Remote Controlled Product Application Boat		\$425.00
TORMADA T2 Series	Remote Electric On/Off Valve	\$525.00
Additional Battery	7.2 volt High Power NIMH Battery	\$75.00

DE-ICER

Keep your lake, marina, pond, or most any body of water open and free from ice formation. Our de-icer will keep ice from forming and prevent damage to your property.

- Prevention of ice-jacking
- Gives you the option to keep your dock and boat in all year round
- Allows for pond water to remain open for fish and wildlife

1/2 HP De-Icer
\$475.00

De-icers work by moving water warmed by the earth up to the surface, preventing ice formation around your pond or dock area. Not only will this save your docks, but also the pilings and shoreline landscaping that needs protection against the damaging effects of ice.

U.S. Patent Pending. These items are manufactured by Lake Restoration, Inc. in Rogers, MN.

FOUNTAINS & AERATORS

Add beauty and elegance to your landscape while improving your lake or pond. Discover the benefits that aeration will provide.

Our Vitaflume® floating fountains are the perfect centerpiece for your pond or lake. Our fountains are simple to assemble and maintain, and have a low operating cost.

- Simple plug-in and go operation, one person installation
- Fountain ships assembled in one box
- Direct from the manufacturer
- Operates in just 20" of water
- Low Operation Cost: Fountain = 7 cents/hour
- Optional spray patterns and lighting

VORTEX Fountain	50' CORD	100' CORD	150' CORD

GOOSE D-FENCE®

The Goose D-Fence® is a patented, retractable fence that keeps unwanted geese off your property. When it comes time to play, mow, or access the water, just wind it up.

- Retractable convenience
- Proven goose deterrent
- Simple 10 minute install
- Inconspicuous and attractive
- Over 10,000 units sold

Goose D-Fence System (spans 150 linear feet)	\$79.00
Replacement Spool	\$23.00
Additional Post	\$7.00

Each Goose D-Fence® includes the patented retractable system and post with a stainless steel receptacle and one additional post. It covers 150 feet with a typical two line set-up. Purchase additional posts to accommodate your individual needs. We recommend an additional post for each 50 - 60 feet you are spanning.

U.S. Patent #'s 6,622,436 and 6,626,391
Manufactured by Lake Restoration in Rogers, MN.

ADDITIONAL PRODUCTS

Hydrothol Granular

This granular aquatic herbicide and algaecide controls nearly all lake weed and algae varieties.

- Controls milfoil and hydrilla
- Works best on firm, sandy lake bottoms
- Improves access to the water for recreation

Flumigard

Our best option to combat watermeal is FlumiGard Herbicide. Watermeal is a challenge to control and can easily double in area in days! FlumiGard controls invasive floating weeds, as well as a variety of algae and submerged weeds.

- Control floating weeds like watermeal & duckweed
- Also control pond weeds like milfoil and hydrilla
- Results seen in just 7-14 days

Aquathol Super K

Aquathol Super K is a highly concentrated granular herbicide that controls a wide variety of submerged weed types.

- Excellent for milfoil or hydrilla control
- Popular for curly-leaf pondweed control
