EPA Registration No. 70506-191

EPA SLN No. NY-080005

"Day after Application" Swimming Restriction

- Note: In order to allow for sufficient mixing of this product after application to bodies of water, swimming in the treated area is restricted until the day after application.

Classified for
"RESTRICTED USE"
in New York State
under 6NYCRR Part 326

2. Concentration of endothall acid in a public drinking water source must not exceed 0.05 ppm (50 ppb) in New York State. Applicators must consider the unique characteristics of the treated waters to assure that the endothall acid concentration does not exceed 50ppb at the public water intake.
- Note: There are no chemical specific New York State drinking water standards for endothall acid. Based on its chemical structure, this chemical falls under the 50 micrograms per liter New York State drinking water standard for "unspecified organic contaminants" (10NYCRR Part 5, Public Water Systems).
 - Note: This labeling must be with the product when sold and be in the possession of the user at the time of application. Follow all applicable directions, restrictions and precautions on container labeling.
