MAKING POND & LAKE WEEDS DISAPPEAR SINCE 1977

Dear Valued Customer

We are pleased to offer a variety of effective products to control your aquatic weeds and algae. Choosing Lake Restoration means choosing a company with more than 48 years of experience. With experience comes knowledge, and we combine this with up-to-date technology and techniques to ensure the best quality products and services. From backyard ponds to lake shores to entire lakes, we will help you rid the unsightly weeds so you can enjoy your water to the fullest degree.

Our Lake Restoration products include herbicides, algaecides, nutrient reducers, and mechanical products to control your weeds and algae. Our aquatic plant management experts carry a depth of knowledge to help you select the best products for your specific situation. From weed identification to product recommendations and tips, our experts will guide you to beautiful water. Call or email us to get started on your treatment plan so you can make great memories on a gorgeous pond or lake shore!

Sincerely,
Your Lake Restoration Team

Who We Are & Your Stories

PROVEN PRODUCTS

- Product guarantee
- We only sell products we have experience using
- EPA approved products with no swimming or fishing restrictions

EXCELLENT SERVICE

- Plant identification help
- Products to fit your goals
- Dosage for your tools and area
- Personalized pond or lake care

Kate's pond in VA

"When I retired in 2008 I decided to learn how to manage my lovely pond. The experts at Lake Restoration gave me the information I would need to restore my pond to a healthy state. It was so easy to call, describe a problem, send a photo, and they were incredibly knowledgeable and patient.

They gave me the exact prescription for what I now call the pond's "monthly cocktail"... My personal "pond doctor", Katie, has supplied me with great tips and details like temperature requirements, application quantities, and precautions. I am so much better prepared to manage the ever-changing needs of the pond. I now feel prepared to provide the pond with what it needs to stay healthy. If I don't, I call Katie!

It is lovely to paddle around the pond and see the spring blooming dogwoods and Japanese Iris along the shore or even cast a line. Lake Restoration's team and their products have made me successful in my retirement and they have made my pond a beautiful asset for my home and for the home of our fish, birds and wildlife!" -Kate

Submit your photo and story for a chance to be featured in next year's catalog!

HOW TO CLARIFY YOUR WATER

Murky waters, foul odors, organic matter, and sediment build-up are common issues pond owners must face. Ponds naturally decline toward these unfavorable conditions when not properly cared for. Use these solutions to revitalize and maintain a healthy pond.

PHOSCONTROL Page 11

Phosphorus is a common element found in waters. Binding the phosphorus clears up the cloudy waters.

SPARKLEAR Page 9

Bacteria and enzymes eat away at many organic materials and work to improve water clarity.

POND DYE Page 10

Shading the water helps filter some of the sun's rays, and cools the water down, while looking stunning.

FOUNTAIN Page 12

Aerators or fountains help exchange gases trapped in the water, creating a better environment for fish.

Treating excess nutrients is essential for those creating, maintaining, or restoring a beautiful pond or lake shore.

NEW LAKE SHORE BUNDLE!

DOCK & SWIM AREA PRO

Use what the professionals use.

Weed Identification and Treatment Tips

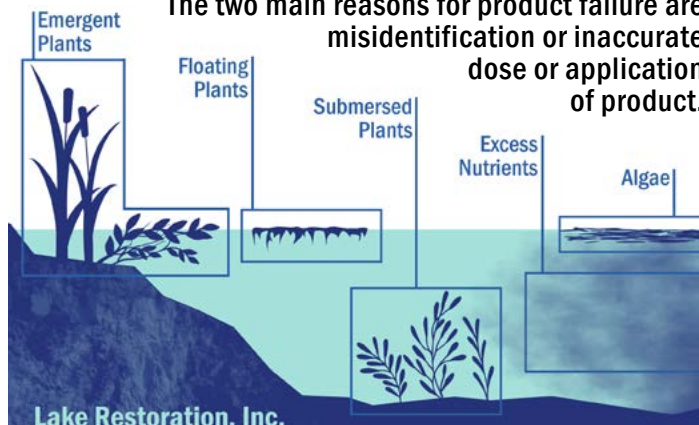

Our goal is to help keep your water and wallet looking great all season long! These tips are general guidelines; always read the product labels prior to applying.

View full **TREATMENT TIMELINES** and our professional recommendations on pages 3 and 13.

Proper plant identification is essential!

The two main reasons for product failure are misidentification or inaccurate dose or application of product.

- Submerged weeds can grow back within 4-6 weeks. Algae can grow back within 10-14 days.
- Most herbicides and algaecides work best when the water temperature is 60°F or more.
- Spray herbicides onto water's surface when treating submerged weeds; they will sink.
- Herbicides and algaecides work on contact.
- Treat when plants are present and mature.
- Apply on a calm and clear day.
- Reapply when plants regrow.
- Treat your pond multiple times per season.
- Break up thick mats of algae before treating.
- If algae are around the perimeter of the pond, treat the whole perimeter.
- Oak leaves and evergreen needles may require more applications of MuckMaid.

10,000 sq. ft.	\$141.00
1/2 acre	\$207.00
1 acre	\$361.00
Watermeal Products	
1/2 acre	\$216.00
1 acre	\$359.00
Pricing continues in back	

Save **15%** when purchasing our packages!

This combination of products is the **complete solution** for any pond.

DIBROX® MIZZEN® SPARKLEAR® DEEP BLUE DYE REPEAT

#1

Use herbicide treatments when weeds are actively growing

#2

Use algaecide treatments for algae when actively growing

#3

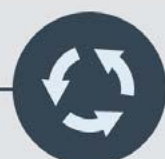

Add nutrient reducers to promote water clarity, bind excess nutrients, and reduce organic matter

#4

Use pond dye to add a pleasing blue color to your water

More info on the next page.

#5

Repeat steps every 4-6 weeks, or when weeds/algae are actively growing

Emergent Weed Control

POND TREATMENT PRODUCTS (CONT.)

Dibrox is a powerful, fast acting, reliable herbicide that kills a wide variety of floating and submerged weeds.

Mizzen is our #1 seller in cost effective algaecides and offers the best control for algae, also targeting less common types.

SparKlear clears up the water by digesting the excess nutrients and dead organic material in your pond.

Pond dye gives your pond a naturally beautiful look, while filtering sunlight at the same time.

WATERMEAL TREATMENT PRODUCTS

Semera/Flumigard is a great herbicide to control watermeal. Mizzen, SparKlear, and dye included.

Semera is a fast acting herbicide that provides excellent control of the most aquatic plants, including some algae.

CATTAIL & WATER LILY CONTROL ★★★★★

Imox controls many emergent plants **down to the root**. Mix the nonionic surfactant to help the herbicide stick to the plants.

- Best used on mature plants for maximum impact
- Mix 2 ounces of each per gallon of water and spray
- Hardy-rooted plants may need multiple applications
- Complete results within 4-5 weeks
- Gets down into the root system

32 ounces Imox & 32 ounces surfactant \$143.00

Kills plants down to the root!

Controlled by Imox:

SPRITFLO® ★★★★★

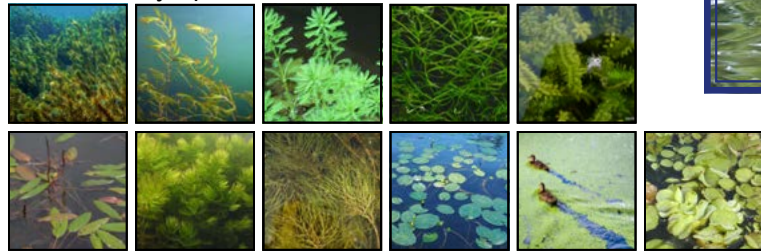

Get the most out of your pond this season. Simply pour Spritflo in and see complete, long-lasting results.

- Kills plants within 30-45 days with extended control
- Can be applied early to prevent growth
- Complete control of unwanted weeds
- Travels through entire body of water
- No drinking water restrictions
- For ponds with no outflow
- Long lasting results
- Pour in directly

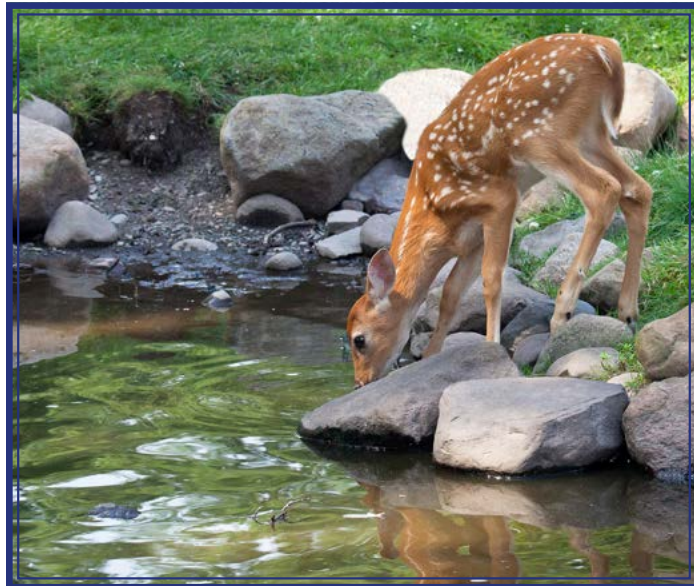

8 ounces	\$249. ⁹⁹
Pricing continues in back	

Controlled by Spritflo:

Lowest fluridone prices!

DIBROX® ★★★★★

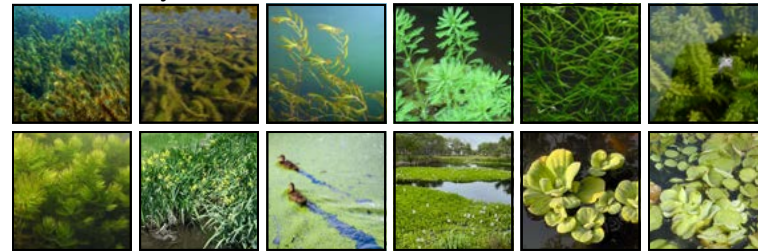

Dibrox is a powerful, fast acting, reliable herbicide that kills a wide variety of floating and submerged weeds.

- Mix 8 ounces per gallon of water and spray
- Controls submersed plants in 17-21 days
- Kills duckweed in as little as 1-3 days
- Cost effective
- Fast acting

1 gallon	\$142. ⁰⁰
Pricing continues in back	

Controlled by Dibrox:

Apply with ease using the Tormada

COMBINE WITH MIZZEN

Control weeds AND algae at the same time!

Treating plants and algae at the same time provides better results with less effort.

Herbicides

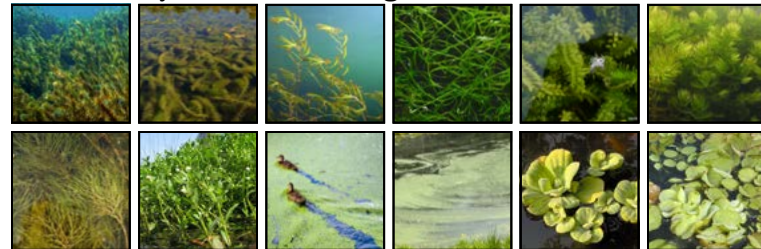

SEMERA® & FLUMIGARD® ★★★★★

These fast acting herbicides provide excellent control of the most aquatic plants, including some algae.

- Fast acting
- No drinking water restrictions
- Control persistent weeds and some algae
- Only products available to control watermeal
- Dissolve and mix 1 ounce per gallon of water and spray
- Best used in the morning when pH is naturally lower
- Control floating plants in as little as 1-3 days
- Control submersed plants in 14-21 days

1 pound	\$115.00
Pricing continues in back	

Controlled by Semera or Flumigard:

Professionals' favorite!

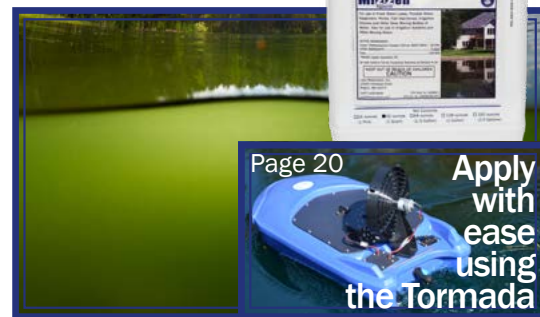

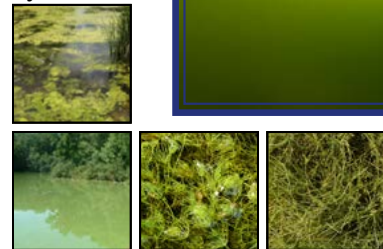

To control rapidly replicating plants such as duckweed or watermeal, spraying every piece is necessary.

MIZZEN® ★★★★★

Mizzen is our #1 selling algaecide, offering the best control for algae, also targeting less common algae types.

- Copper algaecides are the best products to kill Chara, and generally offer the best control
- No irrigation or drinking water restrictions
- Control algae in only 7-14 days
- Mix 16 ounces (27 for planktonic) per gallon of water and spray
- Can be sprayed with Dibrox
- Cost effective
- Fast acting

Controlled by Mizzen:

1 gallon	\$44.00

Manufactured by Lake Restoration, Inc.

Algaecides

CAPE FURL® ★★★★★

Cape Furl is a great algaecide for ponds with trout, koi, or channel catfish. It noticeably bubbles and discolors the algae quickly.

- Sodium carbonate algaecides should be used when trout, koi, or channel catfish are present
- Easy to apply, just broadcast the powder
- Fast acting, works on contact
- No irrigation restrictions
- Results in minutes
- Can use on wet surfaces like algae on rocks
- Best results when used within a year of purchase

40 pounds	\$139.99
Pricing continues in back	

Controlled by Cape Furl:

A Lake Restoration, Inc. product

Water Clarifier

SPARKLEAR® ★★★★★

Sparklear clears up the water by digesting the excess nutrients and dead organic material throughout your pond.

- Fast acting, results within a few days
- No irrigation restrictions
- Removes odors
- Bacteria works for 2-4 weeks
- Mix equal parts SparKlear and water and spray or broadcast the pellets
- Best results when used within a year of purchase

10 pounds	\$123.00
Pricing continues in back	

Page 20
Apply with ease using the Tormada

MUCKMAID® ★★★★★

Remove the inches of sludge on the bottom and improve water quality.

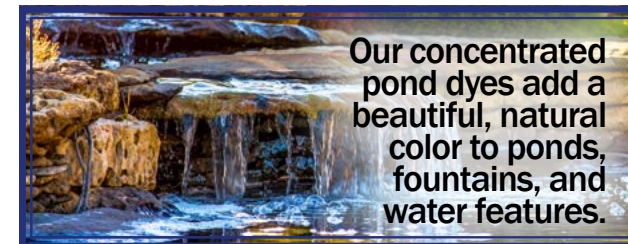

- Eats 1-3 inches of muck per treatment
- Easy to apply, just broadcast the pellets
- More info on [page 18](#)

Pond Dyes

LAKE RESTORATION® POND DYES ★★★★★

Pond dyes give your pond a naturally beautiful look while filtering sunlight at the same time. Filter more colors with Sapphire Bay, or choose from three colors with our value dyes.

- Pour or toss packet directly into the water
- Shade and keep water cooler
- No irrigation restrictions
- Results in a few hours
- Safe, food grade dye

SAPPHIRE BAY® PREMIUM DYE ★★★★★

LR VALUE DYES

1 packet	\$16.50
32 ounces	\$29.00
Pricing continues in back	

SAPPHIRE BAY

1 packet	\$21.50
1 gallon	\$50.00
Pricing continues in back	

PhosControl

PHOSCONTROL® ★★★★★

PhosControl is a valuable tool for locking up phosphorus in your water. Control phosphorus and clarify your water.

- Best used as a proactive effort for nutrient reduction
- No irrigation or drinking water restrictions
- Most effective when plants are dormant
- Improves water clarity within 24 hours
- Removes clay turbidity at high rates
- Simply broadcast powder
- Binds to free phosphorus

Be proactive against nutrients!

10 pounds	\$42. ⁰⁰
Pricing continues in back	

Fountain

VITAFLUME® VORTEX FOUNTAIN ★★★★★

Add beauty and elegance to your landscape while improving your pond's health with our Vitaflume floating fountain! This is the perfect centerpiece for your pond or lake.

- 1 year warranty
- Low maintenance
- Low cost, high quality
- High-volume aerating fountain
- Powered by standard outlet (115V)
- Timer programmable at 15-minute intervals

Fountain w/ 50 ft. cord	\$1,145. ⁰⁰
Fountain w/ 100 ft. cord	\$1,295. ⁰⁰
Fountain w/ 150 ft. cord	\$1,445. ⁰⁰
Light set w/ 50 ft. cord	\$675. ⁰⁰
Light set w/ 100 ft. cord	\$725. ⁰⁰
Light set w/ 150 ft. cord	\$775. ⁰⁰
Call or go online for more options	

WHAT'S INCLUDED

- Power cord: 50 ft., 100 ft., or 150 ft.
- Mooring ropes and stakes
- Programmable timer
- 1/2 HP motor. 3/4 HP & 1 HP pricing in back

Manufactured by Lake Restoration, Inc.

Add a dazzling charm to your pond fountain!

OPTIONAL LIGHTING

- 3 LED lights: 9 watts each
- Easy to attach anytime
- Color: bright white

Lake Treatment Packages

DOCK & SWIM AREA PRODUCTS ★★★★★

Our lake products are designed to give your lake shore the healthy and beautiful look it was intended to have. Use the herbicide and algaecide to kill nuisance plants and MuckMaid to eat the inches of muck on the bottom.

Save **15%** when purchasing our Dock & Swim Area package or \$45-\$150 for the granular versions!

These products are the best solution for your lakefront.

AQUA STORMFURO®

Eliminate muck and improve water quality safely with the Aqua Stormfuro. Our aquatic blaster pushes muck, debris, and weeds out of the area, keeping your waterfront clear.

- Keeps up to 30 ft. clear in the direction it is pointed
- Low cost, high quality
- Low maintenance
- 1 year warranty
- Easy to mount by dock or post

Aqua Stormfuro	\$1,095.00
----------------	------------

WHAT'S INCLUDED

- Stainless steel 1/2 HP motor, PVC housing
- 115V, 10 amps, 3450 RPM
- 4 ft. pole, 1 in. diameter
- Dock or post mount
- Power cord: 50 ft.

Dock De-icer

DE-ICER ★★★★★

Keep nearly any body of water open for your dock, boat, or wildlife. Our de-icer will keep ice from forming and prevent damages to your property.

- Low cost, high quality
- Low maintenance
- 1 year warranty
- Easy to mount

De-icer	\$645.00
De-icer with mount	\$985.00

WHAT'S INCLUDED

- Stainless steel ½ HP motor with protective cage
- 115V, 10 amps
- Power cord: 50 ft.
- Housing, stainless steel: 18 in. tall
- 2 suspension ropes: 25 ft. each
- Optional mount for dock or post

Product Application Solutions

TORMADA®

This product application boat enables your waters to be treated right from the shoreline. Take the chore out of treating nuisance plants.

- Can be controlled from 1,000 ft. away
- Simple setup: connect the battery pack
- Fun, convenient, and easy to use
- Reduces exposure to products
- Low maintenance
- 1 year warranty

CHOOSE FROM 2 MODELS

- T1: Manual valve to dispense at different rates
- T2: Electronic valve opened and closed by controller

- Fan powered boat
- One gallon tank
- Drives up to 4 mph
- Rechargeable battery
- Weighs 20 lbs.
- 32.5 in. x 16.48 in. x 6.25 in.
- Controller and charger included

Tormada T1	\$497.00
Tormada T2	\$597.00

PRODUCT GUARANTEE

Lake Restoration, Inc. guarantees the EPA registered products we sell will kill weeds or algae listed on the labels when products are used according to label specifications. Lake Restoration, Inc. reserves the right to modify our guarantee at any time without prior notice. Prices throughout the catalog are [subject to change](#).

DAMAGES

Please inspect the packaging of your items when they arrive. If your items arrived damaged please email photos to LRmail@LakeRestoration.com.

WARRANTY & RETURNS

Please contact us regarding needed repairs using our Repair Service Request Form. Unopened and/or unused products returned within 60 days may be refunded after obtaining return authorization. All returns are subject to approval and must meet appropriate criteria prior to processing. All returns must be in brand new condition and in their original packaging. Lake Restoration, Inc. reserves the right to decline any returns made more than 60 days after the original purchase. For more information, visit LakeRestoration.com/refund_returns
