Y. Tanner from New York “My pond has never looked better. With your knowledge and expertise you have turned my once mucky unloved lake into a family favorite! A place that the whole family can enjoy!”

We love to hear your stories! Share yours to our email
LRMail@LakeRestoration.com

Who We Are & Your Stories

Jess from Cross City, Florida “We bought this property sight unseen in the fall. The pond took care of itself for the fall, winter, and some spring and didn’t need much intervention. Once summer rolled around, we started noticing excess weeds in the pond. I reached out to several entities around Florida and finally got referred to Lake Restoration. I took as many pictures as I could and wrote them an email. My pond had gone from a crystal clear healthy pond to a dead grass pit. HELP! Katie told me I had Hydrilla and recommended Spritflo. Once I got the Spritflo, I added it to the pond. After a few weeks I wrote another email starting to have doubts. Katie told me to give it a few more weeks and let it work its magic, and it did! Once the weeds died, I used Muck Maid to clear up the pond, and it went back to its healthy state. Now the pond is crystal clear again.”

NEW products!

BayfloX

- » Fast acting aquatic weed killer
- » Kills watermeal, persistent weeds, and algae
- » Tank mix friendly: can mix with Dibrox & Mizzen for stronger results on weeds and algae

Page 9

RestoreAccess

- » Strong emergent weed killer

Pond Treatment Bundle

Pond Treatment Essentials ★★★★★

This bundle of products tackles all the main problems that plague pond owners: green pondweed growth, slimy algae, scummy water and unwanted odors. Easy two step application of these products kills nuisance plants and algae and clears the water. This is an excellent treatment for any pond.

Professional recommendation for strong and easy pond treatment

Save 10% with our bundle!

Pond Treatment Bundle

Step 1

Tank mix the herbicides and algaecide and spray all at once for a powerful catch-all treatment.

Dibrox herbicide Mizzen algaecide Bayflex herbicide

Step 2

Follow up 1-2 weeks later with SparKlear to clean up dead plants and restore your pond.

SparKlear nutrient reducer

A Lake Restoration, Inc. package.

Watermeal Control

Watermeal Treatment Products ★★★★★

This package includes the necessary products needed to target watermeal and other persistent floating weeds. Mix Bayflox and surfactant together to control floating plants and enjoy seeing your water again.

- » Fast acting
- » Kills watermeal, persistent weeds, and some algae
- » No drinking water restrictions
- » Kills watermeal in 1-3 days
- » Mix 1 ounce per gallon of water and spray surface weeds

Bayflox
NEW! This fast acting, powerful herbicide provides excellent control of most aquatic plants, including some algae. More information on page 9.

Surfactant
This wetting agent helps the herbicide mixture spread over the water's surface. It breaks down the plant's waxy cuticle. Boost Bayflox results on floating plants and algae.

(2 acres) \$193.00
Visit page 19 for more pricing

Emergent Weed Control

Cattail & Water Lily Control ★★★★★

This systemic herbicide, RestoreAccess, kills plants down to the root, so they do not grow back. Surfactant helps deliver the herbicide to the plant. These products are excellent for beach areas above the water line, around ponds, and other areas where plants are blocking your view or use of the water.

- » Gets down into the root system
- » Control unwanted plants long term
- » Safe alternative to Glyphosate or Roundup
- » Complete results within 4-5 weeks
- » Use 2 ounces of each product per gallon of water and spray fully
- » Best used on mature plants for maximum impact

RestoreAccess
Effectively controls cattails, water lilies, grasses, reeds, and other emergent plants to open up areas in and around ponds and lakes. More information on page 10.

Surfactant
This wetting agent helps the herbicide mixture spread over the plant's surface. It breaks down the plant's waxy cuticle. Boost RestoreAccess results on emergent weeds.

(½ acre) \$133.00

Dibrox

Dibrox is an easy-to-use and powerful herbicide. It is excellent for controlling floating and submerged weeds in ponds and lakes. Dibrox is highly concentrated and is quickly absorbed by plants. It is great for spot treating or for treating small areas in large bodies of water.

- » Best seller
- » Cost effective
- » Fast acting
- » Can be mixed with Mizzen & Bayflox in a sprayer
- » Product guarantee
- » Kills duckweed as fast as 24 hours, full results after 1 week
- » Controls submerged weeds in as little as 10-21 days
- » Mix 8-16 ounces per gallon of water and spray

Spriflo

Get the most out of your pond this season. Simply pour Spriflo in and see complete, long lasting results. For ponds with no outflow.

- » Treats entire pond
- » Long lasting results
- » Can use to help prevent growth
- » Product guarantee
- » Controls weeds in 30-45 days
- » Control weeds for up to 60+ days
- » Simply pour in, no mixing necessary

How does it work?

Fluridone works by staying active in the water for months, giving you complete and long lasting pond weed control. This makes it a great pond herbicide.

Lowest fluridone prices

Herbicides

Bayflox

Bayflox

Our new, fast acting herbicide provides excellent control of the most amount of aquatic plants, including some algae. Bayflox controls a wide range of weeds effectively and quickly.

- » Fast acting
- » Kills watermeal, persistent weeds, and some algae
- » No drinking water restrictions
- » Can be mixed with Dibrox and Mizzen
- » Product guarantee
- » Controls weeds in 2-3 weeks
- » Kills watermeal in 1-3 days
- » Mix 1 ounce per gallon of water and spray surface weeds (4 oz. per gallon for submerged)

For hard to control weeds

New!

Control rapidly replicating plants such as duckweed or watermeal

Surfactant

This wetting agent helps the herbicide mixture spread over the water's surface. It breaks down the plant's waxy cuticle. Boost results on floating plants and algae.

Works on contact

Cape Furl

Cape Furl is a great granular algaecide for ponds with trout, koi, or channel catfish. On contact, it quickly bubbles and discolors the algae. Evenly broadcast the granules and see the herbicide working instantly.

- » Fast acting, controls algae in 2-7 days
- » For ponds with trout, koi, or channel catfish
- » No irrigation restrictions
- » Can use on wet surfaces such as rocks, docks, decks, etc.
- » Product guarantee
- » Simply broadcast the powder

1 lb. (1,000 ft. ²)	\$14.99
2.5 lbs. (2,500 ft. ²)	\$19.99
10 lbs. (10,000 ft. ²)	\$47.99
20 lbs. (½ acre)	\$82.99
40 lbs. (1 acre)	\$139.99

PhosControl

PhosControl is a valuable tool for locking up phosphorus in your water. Control phosphorus and clarify your water.

- » Best used for proactive nutrient reduction
- » No irrigation or drinking water restrictions
- » Product guarantee
- » Binds to free phosphorus
- » Removes clay turbidity at high rates
- » Improves water clarity within 24 hours
- » Simply broadcast the powder
- » Most effective when plants are dormant

! Be proactive against nutrients
Phosphorus is a common element found in waters. Bind the phosphorous and pull particles out of suspension by using PhosControl. This helps clarify your water.

1 lb. (2,500 ft. ²)	\$19.99
5 lbs. (10,000 ft. ²)	\$30.00
10 lbs. (½ acre)	\$42.00

MuckMaid

Dissolve muck and improve water quality with MuckMaid. Eliminate 1-3 inches of muck per month with this powerful lake bottom conditioner.

- » Eats 1-3 inches of muck per treatment
- » 1 billion count bacteria per pound
- » No irrigation or drinking water restrictions
- » Natural, beneficial bacteria, enzymes, and trace minerals
- » Product guarantee
- » Results within 2-4 weeks
- » Easy to apply, just broadcast the pellets
- » Best results when used within a year of purchase
- » Reapply every 2-4 weeks until desired results

Expose the sand underneath the sludge

There are many problems associated with lake sludge: gross, squishy lake bottom, increased nutrients for plant growth, and murky water all make your lake shore less appealing. With MuckMaid pellets, you can gain back control of your lake and enjoy the water as intended.

1 lb. (2,500 ft. ²)	\$30.00
5 lbs. (10,000 ft. ²)	\$90.00
10 lbs. (½ acre)	\$145.00
20 lbs. (1 acre)	\$215.00
30 lbs. (1½ acres)	\$273.00
40 lbs. (2 acres)	\$325.00

Goose Deterrent Fencing

Goose D-Fence

Keep unwanted geese off your property with our retractable system. This chemical-free goose deterrent system eliminates access to food and water for geese, which makes them move on to find another place to stay.

- » Low cost, high quality
- » Proven goose deterrent
- » Inconspicuous and convenient
- » Tens of thousands of units sold
- » Simple 10-minute setup
- » Spans 250 feet with a 2-line setup
- » Each system includes a main post with retractable line and one post

Manufactured by Lake Restoration, Inc. U.S. Patents #6,622,436 & #6,626,391

! We recommend an additional post for each 50 feet you are spanning.

Why don't they fly over the goose fence?

Each summer, geese shed their feathers and thus lose their ability to fly. During the rest of the summer, they simply prefer not to fly if they don't have to. By installing the Goose D-Fence close to the water line, you're eliminating their access, and the geese will move on to other locations that better suit them.

Goose D-Fence	\$86.00
Additional Post	\$9.00
Replacement Spool	\$25.00

Toxic Algae Test Kit

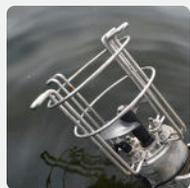

Test your water for the presence of dangerous toxins. Ensure the safe use of water for pets, swimming, and water sports. Each kit comes with everything you need to test your water for toxins.

Vitaflume Vortex Fountain

Add beauty and elegance to your landscape while improving your pond's health with our floating fountain! The vortex is the standard pattern for our aerating fountains. Purchase LEDs at any time. Manufactured by Lake Restoration, Inc.

De-icer

Keep nearly any body of water open from ice for your dock, boat, wildlife, or to prevent damages to your property. Manufactured by Lake Restoration, Inc.

Hydrothol

Controls weeds and algae at the same time. Skip the hassle by broadcasting this two-in-one product. Included in our Granular Dock & Swim Bundle on page 8.

Flumigard & Semera

These fast acting herbicides provide excellent control of most aquatic plants, including some algae. Compare to Bayflex on page 5.

Imox

Controls many emergent plants down to the root. Mix with water and surfactant to help the herbicide stick to the plants. Compare to RestoreAccess on page 6.

Copper Sulfate

Copper sulfate is a granulated algaecide great for treatment of pond and lake algae. The 50-lb bag is also suited for treating areas to eliminate swimmer's itch.

Our goal is to help keep your water and wallet looking great all season long! These tips are general guidelines; always read the product labels prior to applying.

Plant Identification

Proper plant identification is essential. The two main reasons for product failure are misidentification or inaccurate dose or application of product.

Visit page 23 for our Aquatic Plant ID.

Our Recommendations

Here are our professional recommendations put into easy-to-follow steps for your convenience. Once you've got the right products, follow this timeline.

-  Use herbicide treatments when weeds are actively growing.
-  Use algaecide treatments when algae are actively growing.
-  Add nutrient reducers to promote water clarity, bind excess nutrients, or reduce organic matter.
-  Use pond dye to add a pleasing blue color to your water.
-  Repeat every 4-6 weeks, or when weeds/algae regrow.

Products must be used in a manner consistent with their labels. Consult product labels prior to application.

Herbicide and Algaecide FAQ

When should I apply products?

Most herbicides and algaecides work best when the water temperature is 60°F or more. Treat when plants are present and actively growing. Apply on a calm and clear day.

Are these products safe?

Yes, the products we sell are safe for fish, wildlife, and swimming when label directions are followed.

How often do I need to treat?

Treat your pond multiple times per season. Reapply when plants regrow.

How do you apply the liquid products?

Mix with water and spray evenly over the surface. Products will sink and make contact with plants. Always follow label rates.

How do the products work?

Most of our herbicides and algaecides work by killing what they come into contact with.

Do I need a surfactant?

For algae or submerged weeds, no. For floating or emergent weeds, a surfactant helps the herbicide stick to the plants.

When do weeds grow back?

Submerged weeds can grow back within 4-6 weeks. Algae can grow back within 10-14 days.

What if I have a lot of algae?

Break up thick algae mats before treating. Treat one third of the pond at a time two weeks apart so it doesn't deplete oxygen levels for your fish.

Is granular or liquid better?

Most herbicides are broad spectrum so either will work. It depends on your preferred application and exact target species.

Floating

Emergent

“Cannot say enough about this company! Have three years of experience with them. Great customer service and love their products! Birds and frogs used to walk across the thick duckweed on our pond, and now it’s clear! The clarity of the water (we can now see) is spectacular! Had an amazing consultation with a specialist this spring, and their recommendations led us to amazing results. We love that the products are safe for the wildlife that flock to our area. Thank you, Lake Restoration!”

-A K

“I have been using Lake Restoration products for 14 years. Our 2 acre pond was a disaster when we first moved here. The customer service is SUPER helpful and is always there when I have a question.”

-Pat Radant

“Lake Restoration is the expert resource for managing aquatic weeds! I have been a customer for several years and their products work great. I highly recommend Lake Restoration!”

-Gordy Marks

“Very helpful people will answer the phone and guide you to what you need for your pond. I was very pleased and impressed.”

-Pam Perrisick

“Before I called Lake Restoration, I spent countless hours working on my pond clearing reeds and combating duckweed and algae. At 1/3 an acre it was quite labor intensive. Katie helped me identify the weeds, both floating and submerged and recommended products to control these. For the first time in 13 years I have enjoyed the reflection of the sky on my pond through the entire summer.”

-Andreas Graf

“Been using products from Lake Restoration for years. They have transformed my lake front in Tustin, Michigan to something I love and am proud of.”

-Steve Davidson

“Lake Restoration is great! They are my source for my pond management supplies. They provide excellent problem solving advice that helps us keep our pond in excellent condition. Great service I can always count on.”

-Mike Jadrich
